

Valuing the Brands of Consumer Product Companies

January 20, 2015

Valuation Research Corporation

- Formed in 1975, VRC has eight U.S. offices and nine international affiliates.
- VRC provides M & A services, fairness and solvency opinions in support of corporate transactions, and valuations of intellectual property and tangible assets for financial reporting and tax purposes.
- VRC maintains relationships with corporations, lenders, accountants, investment banks, private equity firms, and law firms.
- VRC was instrumental in forming the Appraisal Issues Task Force (AITF), a
 valuation industry group that meets quarterly with representatives from the
 FASB, the SEC, and the PCAOB to discuss valuation issues surrounding
 financial reporting.

P.J. Patel, CFA

- Mr. Patel specializes in the valuation of businesses, assets and liabilities for financial reporting purposes. In particular, he has focused on the valuation of intellectual property/intangible assets such as trademarks, technology, software, customer relationships and IPR&D.
- Mr. Patel is an active member of the AITF and is currently a member of the Appraisal Foundation's Working Group, which is preparing a Practice Aid for valuing customer relationships.
- Mr. Patel is a frequent presenter on valuation issues for financial reporting purposes and has recently presented on valuation issues relating to ASC 805 (SFAS141R), ASC 350/360 (SFAS142/144), ASC 820 (SFAS157) and other emerging issues. In addition, Mr. Patel was on the Fair Value Panel at the 2008 AICPA SEC Conference. He has been quoted numerous times in the press regarding valuation issues.

Brand Valuation Experience

Annual valuation of over \$20b of Brands – book, tax and financing

Introduction

Introduction

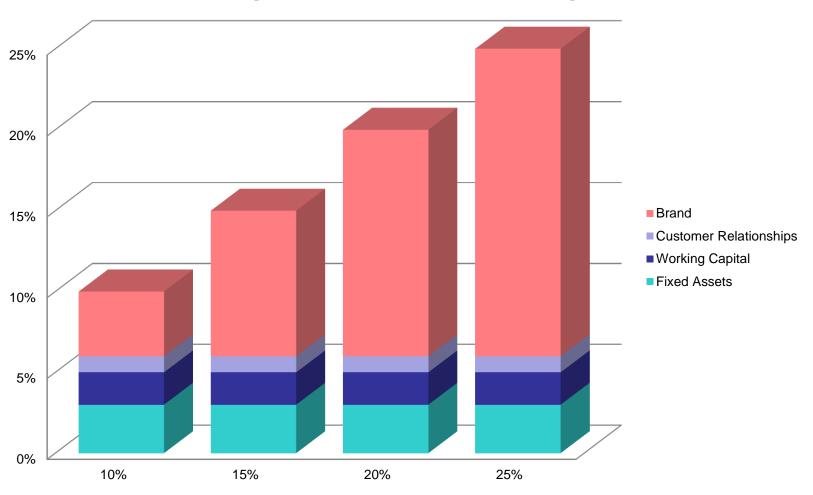

What is a Brand?

- A brand is a name, term, design or other feature that distinguishes one seller's product from those of others. Source: Wikipedia
- A trademark is a word, phrase, symbol, and/or design that identifies and distinguishes the source of the goods of one party from those of others. Source: USPTO – www.uspto.gov
- Book vs tax vs common perception
- Trademarks vs Brands
- Brands typically comprise various elements, such as:
 - Name: the word or words used to identify a company, product, service, or concept
 - Logo: the visual trademark that identifies a brand
 - Tagline or catchphrase
 - Graphics
 - Shapes: the distinctive shapes are trademarked elements of those brands
 - Colors
 - Sounds
 - Scents
 - Tastes
 - Other elements

What Drives the Margin of a CPG?

Margin Attribution vs. Total Margin

Valuation Approaches

Cost Approach

 The cost approach is a valuation technique based on the amount that currently would be required to replace the service capacity of an asset (often referred to as current replacement cost).

Market Approach

 A valuation technique that uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities (including a business).

Income Approach

- The income approach uses valuation techniques to convert future amounts (for example, cash flows or earnings) to a single present amount (discounted). The measurement is based on the value indicated by current market expectations about those future amounts.
 - Relief from Royalty
 - Multi-Period Excess Earnings
 - Excess Margin

Background Info

- Launched over 70 years ago
- Brand is a leading biscuit brand in the US
- Strong awareness, market penetration
- Sold nationwide in all channels including modern trade, traditional trade and AFH
- In 2014, performance was negatively impacted by disruptions at two customers and category weakness
- Going forward, the margin improvement is due to positive pricing and including brand extensions.

| Actual and Projected Data | 2013 | 2014 | 2015 | 2016 |
|-------------------------------|-----------|-----------|-----------|-----------|
| Net Sales | 2,969,982 | 2,694,795 | 2,538,496 | 2,553,728 |
| Net Sales Growth | 2.1% | -9.3% | -5.8% | 0.6% |
| Operating Contribution | 658,848 | 569,649 | 579,486 | 621,877 |
| Operating Contribution Margin | 22.2% | 21.1% | 22.8% | 24.4% |

Income Approach – Relief From Royalty

Relief from Royalty Method

- The Relief from Royalty is a form of the income approach and measures economic benefits directly by calculating the profit (or cash flow) attributable to an asset by reviewing market based royalty rates/license fees.
- Key Inputs are as follows:
 - Revenue and earnings generated by the subject asset
 - Royalty rate
 - Market transactions
 - 25/33% rule of thumb
 - Other profit split methods
 - Appropriate discount rate

Relief from Royalty Method

| Assumptions | | | | | |
|----------------------------------|----------------------------------|-----------|-----------|-----------|-----------|
| Royalty Rate | | 20.0% | | | |
| Long-Term Growth F | Rate | 1.5% | | | |
| Tax Rate | | 19.0% | | | |
| Discount Rate | | 12.0% | | | |
| | | | | | |
| | | 2013 | 2014 | 2015 | 2016 |
| Net Sales | | 2,969,982 | 2,694,795 | 2,538,496 | 2,553,728 |
| Royalty Rate | | | 15.0% | 15.0% | 15.0% |
| Royalty Savings | | | 404,219 | 380,774 | 383,059 |
| Income Taxes | | | 76,802 | 72,347 | 72,781 |
| After-Tax Royalty S | avings | | 327,418 | 308,427 | 310,278 |
| Implied After-Tax Ro | oyalty | Rate | 12.2% | 12.2% | 12.2% |

| Determination of Fair Value | | | | | |
| Present Value of Finite Period | | 1,238,512 | | | |
| Present Value of Residual Value | | | 1,814,268 | | |
| Present Value of Ro | Present Value of Royalty Savings | | 3,052,780 | | |
| Tax Benefit | Tax Benefit | | 306,725 | | |
| Value Indication | | | 3,359,505 | | |

Assessing an Appropriate Royalty Rate

- Data Sources
- Using a Relief from Royalty Method is appealing
 - Easy for everyone to follow and understand
 - Key input (royalty rate) based on market transactions
- Using royalty rate data is problematic due to the following factors:
 - Lack of sufficient information
 - Lack of comparability
 - Dated transactions
 - Many transactions bundled
 - Differences in terms of agreement (e.g. non-exclusive vs. exclusive)
 - Geographic regions may differ
- 25%/33% Rule of Thumb

Income Approach - MPEEM

Multi-Period Excess Earnings Method (MPEEM)

- The MPEEM is a form of the income approach and measures economic benefits indirectly by calculating the profit (or cash flow) attributable to an asset after adjusting for appropriate returns on contributory assets.
- Contributory assets are the assets that are assisting the subject asset in generating revenue and earnings.
- Key Inputs are as follows:
 - Revenue and earnings generated by the subject asset
 - Contributory assets
 - Rates of return on contributory assets
 - Appropriate discount rate
 - Economic life

Multi-Period Excess Earnings Method

| Assumptions | | | | | | |
|------------------------|---------------------------------|--------------|-----------|-----------|-----------|-----------|
| Long-Term Growth F | 2ata | | 1.5% | | | |

With and Without Method – Excess Margins

- Excess margin method is a form of the with and without method and income approach and measures economic benefits directly by calculating the profit (or cash flow) attributable to an asset by comparing it with another similar asset.
- Key Inputs are as follows:
 - Revenue and earnings generated by the subject asset
 - Profit margin for the subject asset and for comparable companies
 - Appropriate discount rate
 - Economic life

Excess Margin vs. Private Label

| Assumptions | | | | |
|--------------------------------|-----------|-----------|-----------|-----------|
| Contract Manufacturer Margin | 5.0% | | | |
| Long-Term Growth Rate | 1.5% | | | |

VRC Case Study

| | Value | Value Change | Notes: |
|------|--------|-----------------|---|
| 1999 | \$1.0b | | Brand acquisition |
| 2004 | \$2.0b | +100% | #1 market share, fast growing sector |
| 2007 | \$2.3b | +15% | Continued growth |
| 2009 | \$1.0b | -57% | Mistakes on pricing, commodity price increase and significant increase in competition |
| 2010 | \$1.3b | +30% | Slight recovery of market share, margins |
| 2012 | \$1.8b | +40% | New opportunities for brand extensions |

Conclusions

- The value of the brand encompasses more than the trademark
- Brands are very valuable but risky
- Valuation methodology selection is very important
 - RFR simple, objective but may not be appropriate
 - MPEEM multiple moving parts may be appropriate
 - Excess Margin simple, objective may be appropriate if good comps are available
